Clematis or if order totals
\$5.00 or more

Clematis Coccinea Hybrids (Co)

A truly distinct group with flowers of trumpet-, bell- and urn-like forms. The plants are medium in height and bloom in summer and autumn, the flowers appearing successively on summer shoots.

Duchess of Albany. Bright pink, trumpet-shaped flower. Date of Bloom July, Oct. \$2.00

Texensis. Urn-shaped flowers of reddish rose, with yellow center. Long-haired seed clusters. July, Oct. 1.00

Clematis Florida Hybrids (Fl)

These varieties are noted for their profuse bloom in early summer, reaching a height of 8 to 10 feet. The flowers are produced on old or ripened wood. It is necessary to remove only dead and weak growth when pruning in late February or March.

Duchess of Edinburgh. A superb double, pure white form. June, July \$1.25

white form. Fine grown on a pillar. June, July \$1.25

Clematis Jackmani Hybrids (Ja)

These large-flowered climbing forms produce their bloom in summer and early autumn successively on new and summer growth. The free-blooming plants reach a height of 10 to 15 feet. They need to be pruned in early spring.

Comtesse du Bouchard. A pleasing shade of pink. Date of Bloom June, July \$1.50

ish rose; petals deeply veined. June, July 1.50

Crimson Star. Rich sparkling red with no purple tones. Very vigorous and free flowering. June, Oct. 1.50

Gipsy Queen. Velvety dark violet-purple flowers of good size. June, Oct. 1.25

Jackmanii. Perhaps the most familiar of all the Clematis hybrids; this old favorite is noted for its great vigor and its abundant violet-purple bloom.

Rapid, vigorous growth. June, Oct. 1.25

Jackmani rubra. The well-shaped flowers are unusually rich red. June, Oct. 1.50

Jackmani superba. Noticeably large flowers of deep violet-purple. June, Oct. 2.00

Mme. Baron-Veillard. Warm lavender flowers of moderate size, carried in generous clusters. The latest of its class to bloom. June, Oct. 1.25

Mme. Edward Andre. Dark purplish red, with rounded petals. Reaches only 7 feet in height but blooms abundantly. June, Oct. 1.25

Mrs. Cholmondeley. Large, open flowers of wisteria-blue, carried in profusion. June, Oct. 1.25

The President. Decidedly rich reddish plum-violet. Very thrifty grower with 10-foot vines. June, Oct. 1.25

Spooneri Rosea. A translucent white variety with mauve pink markings. July, Oct. 1.25

Lady Betty Balfour. Rich purple with a white center. June, Oct. 1.25

Ville de Lyon. An abundance of carmine-red blooms with darker center. June, Oct. 1.25

Prins Hendrik. Large, open flowers of wisteria-blue, carried in profusion. June, Oct. 1.25

Montana Undulata. Soft mauve-pink. A real treasure. 10 to 15 ft. May, June 1.25

Montana Alba. Deep lavender with bright blue tints. June, Oct. 1.25

Montana Rubens. Deep lavender with bright blue tints. June, Oct. 1.25

Plant VINES FOR SHADE and BEAUTY

CLIMBING plants have an important place in every well-planned garden. Having grown the Clematis hybrids for many years and a large number of other kinds of flowering vines, we have come to realize the wide use to which they can be adapted.

Many garden makers think of flowering vines merely as useful plants to screen unsightly areas. We like to think of them as rich, verdant masses of foliage to embellish doorways, porches, pergolas and arbors. In gardens, climbing plants often serve to make a pleasing transition between the house and the garden, or between large trees and small groups of shrubs. More rampant climbers can be used to grow over old tree stumps.

Many of our climbing plants, in addition to interesting foliage and showy flowers, have unusual seed-pods. Both the flowers and the fruits offer unlimited possibilities for indoor decoration.

Climbing plants can often be used to solve the problem of ground-covers in difficult areas. Often where there are outcroppings of rock, such climbing plants as Honeysuckle (in all its forms), Euonymus and Bittersweet can be introduced to clothe bare areas.

Flowering vines trained on arbors and pergolas can often frame an interesting vista which can be enjoyed by the home-owner or the passerby. In summer, climbing plants add to the interest of the garden and often serve as a pleasing background for shrubs, perennials, and annuals. Walls and wire fences make admirable supports for this valuable group of plants.

PLANT *Clematis* NOW

AT LAST the Clematis hybrids are getting their share of attention in the garden world. Although many varieties were known in this country in the 90's, they were forgotten for some curious reason. It is only within the last few years that garden makers have been made to realize the beauty and the value of this great plant family.

No group of climbing plants is more distinctive for its wide color range, its variety of forms, and its decorative possibilities. To be sure, the Clematis is a regal plant but it need not have a spacious setting. In fact, its greatest charm is the pleasing suggestion of informality which it lends to pergolas, trellises, arbors, fences and old tree stumps.

The blooming dates given here are based on observations made here at Fairport in the western part of New York State. As with most plants, the first display of bloom is more profuse than the autumn display. It is important to realize that some varieties produce blooms on new wood and some on old wood. Accordingly, we are presenting the flowers in groups according to type.

Clematis — grown in pots

POTTED specimens of Clematis can be used as decorative features on trellises, porches, and patios. In fact, there are many small gardens where potted plants can be used to great advantage.

A 6-inch pot is large enough to hold an average-sized plant, and a mixture of 3 parts gritty loam and 1 part leafmold or lime is usually satisfactory. Of course, drainage must not be neglected, and moderately firm potting suits the plants best.

To protect the crown of the plant, a bamboo cane, a wire trellis, or a wooden frame of some sort should be used so that the plants will have ample support.

STRONG, OWN-ROOT PLANTS

- Shipped at proper planting time.
- Wrapped with soil on the roots fresh for your order.
- Postpaid in U. S. A.
- Planting instructions with order.
- 38 varieties of Clematis.
- Order Blank enclosed.
